

TO WHAT EXTENT IS THE AMERICAN DREAM STILL ATTAINABLE?

WHAT'S THE AMERICAN DREAM

Home Ownership

Having a Sense of Security

Being Able to Save Financially

Financial Freedom to Spend on Wants
and Needs

Being able to pursue a career of your choice without Financial Burden

EARNING POWER SHAPES ACCESS TO THE AMERICAN DREAM

— Manufacturing
— Finance and insurance
— Professional, scientific, and technical services
— Healthcare and social assistance
— State and local

— Agriculture, forestry, fishing, and hunting
— Mining
— Utilities
— Arts, entertainment, and recreation
— Real estate and rental and leasing

Key Takeaways

- Top wage growth is concentrated in a few sectors
- Earning opportunities are uneven across the economy

INCOME VS SPENDING VS SAVING

Income vs Spending vs Saving 2010-2025

- Personal income nearly doubled from 2010 to 2025
- Personal consumption grew at almost the exact same rate
- Personal savings remained flat throughout the entire period
- COVID briefly spiked savings in 2020 but collapsed immediately after
- Every dollar earned was absorbed by spending, nothing was kept

Key Takeaway: Income growth without savings growth is not financial progress.

PERSONAL SAVING TREND 2010 TO 2025

- Savings stayed flat from 2010 to 2019 despite economic growth
- 2020 spike was driven by stimulus payments, not financial strength
- Savings crashed to 15 year lows by 2022
- Current levels barely above where they started in 2010

Key Takeaway: Americans are not saving more. They are just spending later.

INFLATION

Most values remain positive
(0.2%–0.3%)

Indicates continuous increase in
prices

Contributes to increased spending
and financial pressure

HOME OWNERSHIP

HOUSING OUTPACES
INCOME

AFFORDABILITY IS
DECLINING

BUYING IS GETTING HARDER

ARE WE BENEFITING FROM OUR INCOME?

Measures money left after expenses

No sustained growth in financial flexibility

Income gains are offset by rising spending

SPENDING BY CATEGORY 2000 TO 2025

- Housing and utilities tripled since 2000
- Healthcare costs grew almost as fast as housing
- Food and gasoline grew significantly slower
- Essential costs are rising faster than everything else

TRAVEL CONSUMPTIONS & DEMAND

IN CONCLUSION

OVERALL, THE DATA SHOWS THAT ALTHOUGH INCOME IS INCREASING, INDIVIDUALS ARE NOT EXPERIENCING SIGNIFICANT FINANCIAL IMPROVEMENT.

RISING COSTS, INCREASING SPENDING, AND DECLINING SAVINGS ARE LIMITING FINANCIAL PROGRESS. IN ADDITION, MAJOR EXPENSES SUCH AS HOUSING ARE BECOMING LESS AFFORDABLE.

AS A RESULT, THE AMERICAN DREAM IS BECOMING MORE DIFFICULT TO ACHIEVE. NOT BECAUSE INCOME IS NOT GROWING, BUT BECAUSE THAT GROWTH IS NOT TRANSLATING INTO REAL FINANCIAL GAINS.

THANK YOU
